Education

University of Akron   **GPA: 3.9/4.0**
Computer Science

Front-End Developer Bootcamp | Certificate   **July 2022 – Feb 2023**
Frontend Simplified

Experience

Front-End Developer Internship   **Sep 2022 – Feb 2023**
Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript, and React single-page application into an interactive user interface using animations, transitions, and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination, and dynamic routing.

Full-Stack Developer Intern   **July 2023 – August 2023**
PRC-Saltillo

- Developed and maintained front-end components using Vue.js and enhanced user experience through responsive design with Tailwind CSS.
- Implemented new features and resolved bugs in a PHP-based backend system, contributing to overall system stability and performance.
- Successfully integrated user stories into an existing codebase, demonstrating adaptability and problem-solving skills in a fast-paced development environment.

Full-Stack Developer Intern   **June 2023 – Current**
Codehouse Solutions

- Developed responsive and user-friendly web applications from design prototypes using TypeScript and React, ensuring high-quality user experiences.
- Utilized a Kanban board to manage project tasks and track progress, facilitating seamless project coordination and efficient Agile development.
- Implemented secure API endpoints with AWS AppSync, providing efficient data access while prioritizing data security and authentication.

Projects

Space Model | Website | GitHub

- Integrated an external API to dynamically fetch and display detailed descriptions and information about each planet, ensuring up-to-date and informative content.
- Developed an interactive web application using React.js and Three.js, leveraging the Tween.js library to implement smooth animations, providing users with an immersive experience within the space model.

Video Game eCommerce Store | Website | GitHub

- Developed a React-based multi-page eCommerce website with an interactive user interface, search functionality, shopping cart, and user data-saving capabilities.

Technical Skills

Skills: HTML5, CSS, (Tailwind.css), JS & TS, React.js, Three,js, Redux, Vue.js, Git, AWS, Firebase, PHP, C++, Python
